POSTSCRIPT AND RELATED
ADOBE TECHNOLOGIES

Adobe

WELCOME TO THE ADOBE POSTSCRIPT SOFTWARE DEVELOPMENT KIT CD

Building the best applications requires the right tools. This CD contains everything you need to develop Adobe PostScript applications—from reference manuals and technical notes to helpful tips and utilities. You'll also find training information, support options, and Adobe Developers Association newsletters.

Use these tools as the blueprint for your own ideas.

Click here to go the
SDK Main Menu.

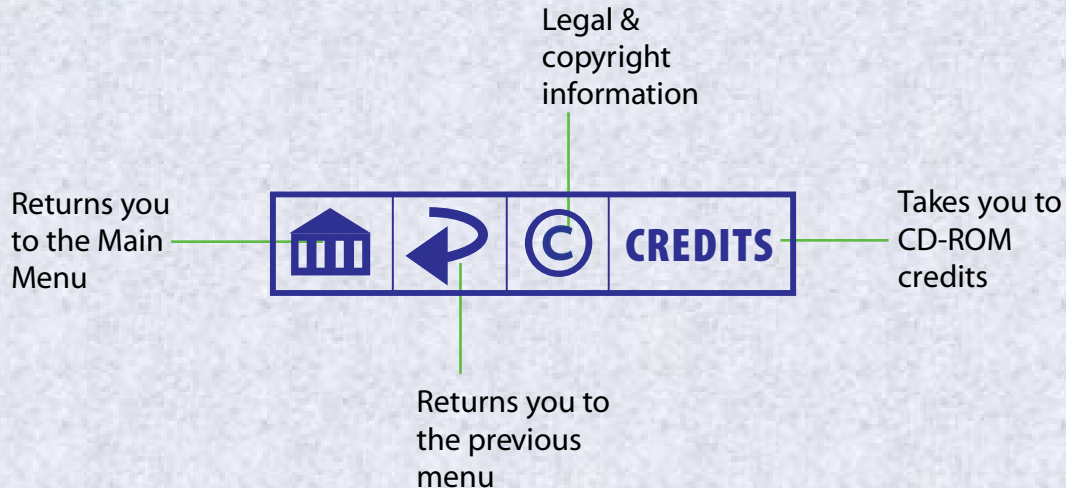

For navigation tips,
go to the next page.

EXPLORING THE ADOBE POSTSCRIPT SOFTWARE DEVELOPERS KIT

Click on a link (●) to go directly to a particular section or use the following toolbar buttons.

To return to the previous menu after opening a technical document file on the CD, use the close box in the upper left of the document window.

POSTSCRIPT® FAX

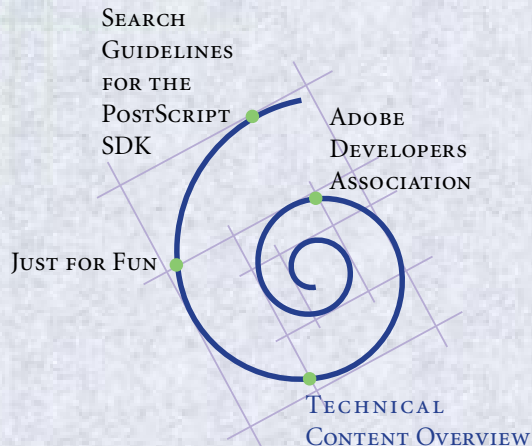

Various technical notes concerning PostScript Fax, including protocol specs and tutorials. See also the PostScript Language Reference Manual supplements. Directory CCITT_PS contains a sample program to print CCITT compressed data using PostScript Level 2 filters.

UNSUPPORTED TECHNOLOGIES

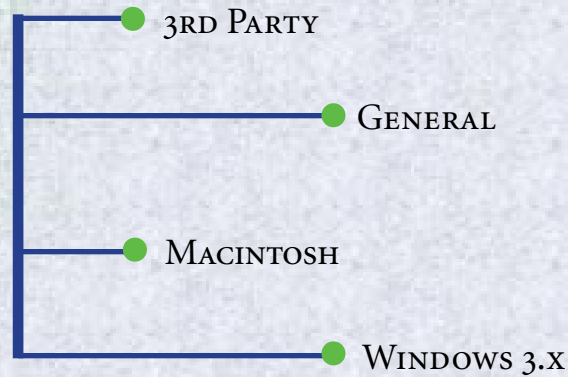

We cannot provide technical support on the technologies in this directory. However, we provide you what information we can in order to help you explore for yourself.

The OPI directory contains the Open PrePress Interface specification. The TIFF directory contains the Tagged Image File Format specification.

TOOLS

We have included a number of tools and utilities which we think you might find useful. The Macintosh directory contains Macintosh applications, Windows 3.x contains Windows applications, General contains PostScript language utilities, and 3rd Party contains non-Adobe tools. The non-Adobe tools are covered by their own license agreements and Adobe does not support them.
